Junior Beaver 4 Series

The Limb Beaver Junior Beaver Series is built for operators who need more cutting power and greater control without stepping up to a full-size industrial unit. Designed for skid steers and tractor loaders, these 48-inch brush and limb-cutting attachments deliver robust performance for demanding vegetation-management tasks.

JB 4

With the ability to cut limbs up to 4 inches in diameter and reach working heights of up to 200 inches, the Junior Beaver Series offers the strength to tackle thicker overgrowth while maintaining the agility needed for roadside work, field edges, trails, and tight-access areas.

Operators can further customize performance with optional hydraulic tilt or hydraulic swing functions for precise positioning, as well as an optional wireless remote control for convenient, operator-friendly adjustment on the fly. These features make the Junior Beaver Series a versatile, productivity-boosting solution for municipalities, road crews, farmers, land managers, and property owners who demand efficiency and clean, consistent results.

4 Foot Limb Trimming & Brush Clearing Attachment For use with Skid Steers & Tractor Loaders
